WEB DEVELOPER

megan sophia steblay

PROJECTS:

Tech Blog

- This application provides a space for developers to publish their thoughts as blog posts or to comment on others' blog posts. By connecting to a MySQL database, it allows users to log into the site and have discussions with one another.

- Technologies: *MySQL, Express, Handlebars*
- URL: https://fast-meadow-10211.herokuapp.com/

Trivialympics

- Trivialympics is a team-built, online boardgame, where you, the user, progress across a gameboard by answering trivia questions correctly. This application uses authentication to allow users to log in and add new trivia questions to the database.

- Languages: *MySQL, Express, Handlebars, GreenSock*
- URL: https://young-harbor-83683.herokuapp.com/

Blitz and Chaos

- Blitz and Chaos is a team-built, text-based, interactive story (run by JavaScript) providing you, the user, with a chance to play through a life as a hero. The choices you make along the way change the experience and outcome of your story.

- Languages: *JavaScript, CSS/Bootstrap, HTML*
- URL: https://justinean.github.io/BlitzandChaos/

Employee Tracker

- The Employee Tracker is a command-line application that provides an easy solution for managing a company's employees, allowing employers to view and manage different roles, departments, and employees within their company.

- Languages: *MySQL, Node, Inquirer*
- GitHub: https://github.com/msteblu/EmployeeTracker/
